a unique introduction to the philosophy of science with special emphasis on the life sciences part i presents elementary but fundamental concepts and problems in epistemology and their relation to questions of scientific methodology part ii deals with case studies from the history of biology which illustrate particular philosophical points while part iii progresses to more complex ideas as on the nature and methodology of science part iv discusses the limitations of scientific enquiry and its relations to other systems of knowledge and interpretation

ordinarily textbooks are developed by first writing chapters then making decisions about art and images and finally once the book is complete assembling a test bank and ancillary media this process dramatically limits the integration across resources and reduces art media and assessments to ancillary material rather than essential resources for student learning biology how life works is the first project to develop three pillars the text the visual program and the assessment at the same time all three pillars were developed in parallel to make sure that each idea is addressed in

the most appropriate medium and to ensure authentic integration these three pillars are all tied to the same set of core concepts share a common language and use the same visual palette in this way the text visual program and assessments are integral parts of student learning rather than just accessories to the text

first published in 2004 this book by internationally recognized leaders in the field clarifies how adaptive processes rather than geographic isolation can cause speciation

the first work to deal exclusively with objective criteria for comparing statistical models using a simple framework it outlines a general strategy for selecting a model and applies this strategy to develop methods useful for solving specific selection problems topics covered include histograms univariate distributions simple and multiple regression the analysis of variance and covariance the analysis of proportions and contingency tables time series analysis and spatial analysis
